

ENERGY TRANSITION IN THE DUTCH-GERMAN BORDER REGION

The energy transition is an international challenge requiring cooperation and the sharing of knowledge to succeed. To provide more insight in cross-border cooperation in the sectors of renewable energy and energy efficiency, we are organizing the network event "Energy Transition in the Dutch-German Border Region" in cooperation with municipalities and Kreisen along the border. Join this event to stay up to date on the latest developments and possibilities in the field of energy storage, green gas, heat, regulations, finances and subsidies, as well as the development and support of energy regions and local energy communities.

During the event you will be inspired by the experiences, opportunities and challenges on both the Dutch and German side of the border. You will also have the possibility to share your own experiences with other participants.

Morning Program

During the plenary morning program, an overview of the similarities and differences between the Dutch and German energy systems will be provided. This will be followed by a presentation of a recently conducted study on possibilities for cross-border energy cooperation. Afterwards, a range of energy projects will be pitched. After these pitches an information market will be held to provide you with more information about the projects and allow you to ask questions.

Networking Lunch

During the lunch you will have the opportunity to form new connections and expand your network.

Afternoon Program

During the afternoon program you can attend two workshops of your choice, allowing you to share ideas and gain new insights. There are seven different options for you to choose from, listed on this flyer.

PROGRAM 13 SEPTEMBER:

9.30 - 10.00	Walk-in
10.00 - 11.15	1. Opening
	2. Presentation of Dutch and German energy system and study on cross-border energy cooperation
	3. Pitches of the projects
11.15 - 12.30	Information market
12.30 - 13.30	Network lunch
13.30 - 14.30	Workshop round 1
14.30 - 14.45	Break
14.45 - 15.45	Workshop round 2
15.45 - 16.00	Wrap up
16.00 - 16.30	Drinks and networking

TOPICS OF THE WORKSHOPS

- Developing an energy region
- Energy storage (incl. hydrogen)
- Green gas
- Heat
- Finances & subsidies for renewable energy projects
- Regulations (national and international regulations on electricity transportation and i.e. the Treaty of Meppen)
- Supporting local energy communities (energy blueprints for other communities to adopt)

Registration

Participation in the event is free, however parking costs are not included. For directions to the theatre please check: <http://www.atlastheater.nl/parkeren/>.

Please be aware that there are limited spaces available for the event. Registration is mandatory and possible until the 3rd of September, 2018 17.00h CET via this link:
